

UNION CARBIDE CORPORATION
SILICIDES AND URETHANE INTERMEDIATES

July 3, 1980

MEMORANDUM TO: D. G. Moshier

Copies To: D. G. Beddow
A. W. Boyd
J. B. Mickey

Subject: Special Projects -
Progress and Current Status

79-1 WATER QUALITY - Energy Systems is following construction and will report progress and completion.

79-2 BURIED WASTE - Water samples from four of the test wells at the North site have been analyzed for 129 Priority Pollutants by Compu-Chem, and only one sample has been found to exceed levels of arsenic and phenols allowed for drinking water. All other pollutants are below detectable levels. If analyses of samples from another well, and Sugar Camp Run show results similar to those above, there will be little need for extensive further work on this project beyond clean-up, cover-up and occasional test well sampling and analysis. Water level measurements were monitored to attempt to establish volume and direction of underground water flow. In the absence of significant contamination, this effort will be discontinued.

79-3 GAS SUPPLY - A signed copy of the gas supply contract has been received by UCC and by Mosswood. We have furnished a Right-Of-Way document for the pipeline on UCC property, and Lauderdale has obtained Right-Of-Ways for all the other properties traversed by the pipeline. Part of the in-plant connections have been fabricated and the Engineering Work Order for the in-plant pipeline has gone to New York for approval. Construction can be expected to begin in July, and has been estimated to require 45 to 60 days.

79-4 MOBAY INCINERATOR PROJECT - No progress. I believe this project is dead.

79-5 25 YEAR CELEBRATION - Five down - one to go. The dinner for 25 year people was held at the Lafayette Sternwheel Room on June 12 with about 180 people present including UCC New York dignitaries, Sistersville retirees, this year's crop of 25-year people, former plant managers, and people with over 25 years service. On June 21 the All-Employee Picnic and Open House, and Dance events ran from 9:00 A.M. Saturday to past midnight, with over 1600 employees and family in attendance. Dick Crum and his staff, and Bernie Johnson, Roland Hall and their people all did a terrific job to make these events successful. Chauncey Rutherford continues work on the 25 Year Memorial Book to be issued in the Third Quarter.
